Limited Lifetime Warranty Manufacturing Defect

We will repair, replace or refund the original purchase and installation price of the defective portion of our siding that blisters, checks, crazes, flakes, peels or weathers unevenly due to a defect in our manufacturing process. Our obligations under this Warranty will in no event exceed the purchase price of the originally installed Products found to be defective and the cost of the labor involved in the original installation of such defective Products. Any additional costs and expenses beyond these amounts are your responsibility.

Limited Fade Warranty

We will repair, replace or refund the original purchase and installation price of any portion of our siding that experiences excessive color fade after the installation of the siding, subject to our examination of a siding sample and you performing at least annual preventative maintenance cleaning. Our obligations under this Warranty will in no event exceed the purchase price of the originally installed Products found to be defective and the cost of the labor involved in the original installation of such defective Products. Any additional costs and expenses beyond these amounts are your responsibility.

Limited Hail Damage Warranty

It is your responsibility to pursue the cost of repair or replacement of damaged material through your homeowner's insurance or all other applicable insurance coverage. After you exhaust such coverage, if you have any product cost that you have incurred in the purchase of the product that is necessary to replace the Product on your property which was damaged by hail, and these costs are in excess of your total insurance coverage (excluding your insurance deductible), we will reimburse you for that difference, up to the cost of replacement Product for the damaged product. Any additional costs and expense beyond these amounts are your responsibility. We will have no responsibility for any costs associated with the labor required to remove, replace or install any product.

In the event of repair, replacement or refinishing under this Warranty, the Warranty applicable to the replacement material or to the repaired or refinished products will extend only for the time remaining under the original Warranty. ***If we elect to repair or replace Products under this warranty, we will also cover the reasonable labor costs for the applicable area, as determined by us.***

Coverage means the extent of our commitment to respond to any claim relating to the siding.

Excessive Color Fade means a change in the color of any siding in excess of a Delta E of four Hunter units, as determined by us, following the initial installation of the siding, provided that any uneven or abnormal fade distribution is not due to a buildup or accumulation of stains, dirt, mold, mildew, or any other deficiency caused by the lack of at least an annual preventative maintenance by the homeowner as such annual preventative maintenance is described in the Installation Manual.

Normal Weathering means the damaging effects of sunlight and extremes of weather and atmosphere that may cause any colored surface to fade, chalk, or become soiled or stained; exposure to the elements will cause gradual, uniform change over time; the degree to which normal weathering occurs will vary depending on air quality, the building's location and other local conditions over which we have no control.

Purchase and Installation Price means the sum of (a) the total original cost of the siding that is defective or otherwise being replaced, plus (b) the total original cost of labor for the installation of siding that is defective or otherwise being replaced. If we cannot determine these amounts from original documents, we will compute the purchase and installation price using (i) our suggested retail price in effect at the time of the installation for the cost of material, (ii) labor rates prevailing in the area where the building is located at the time of installation and (iii) an estimated installation time for the cost of labor.

Residence means regular or full-time permanent lodging by a single family.

Siding means vinyl siding, vinyl soffit or related vinyl accessories manufactured by Style Crest, Inc.

Weathering means changes caused by exposure to sunlight, rain, air pollution, variations in temperature and other atmospheric conditions.

Weathers Unevenly or Uneven Weathering, such as checker boarding, means uneven or non-uniform change in color of contiguous elements of siding under uniform, even and equal exposure to sunlight, natural radiation, rain, natural variations in temperature or other atmospheric conditions.

Care and Maintenance

Style Crest®, Inc. Premium Vinyl Siding, Soffit and Accessories are some of the most durable building products materials available today for residential applications. In most cases, normal rainfall is sufficient to keep it clean. But if your Style Crest vinyl siding should need cleaning, we recommend the following procedures.

Particular attention should be given to areas under eaves, porches, awnings and other overhangs that have limited exposure to the natural washing effect of rainfall.

1. Moderate Atmospheric Dirt — We recommend an occasional washing with clear water using a garden hose and soft-bristled brush (a long-handled, car-washing brush is ideal for this purpose).

2. Heavy Industrial Atmospheric Dirt — Wash in the manner indicated above, but use the following solution:
    a. 1/3 cup detergent (Tide®, for example)
    b. 2/3 cup trisodium phosphate (Soilax®, for example)
    c. 1 gallon water

3. Mildew Accumulation — Mildew can collect on surfaces of all types of building products and is often evident on surfaces that have not been properly cared for and maintained. Normally, mildew will appear as black spots. Mildew is easy to remove by using the basic cleaning solution above with the addition of sodium hypochlorite as follows:
    a. 1/3 cup detergent (Tide®, for example)
    b. 2/3 cup trisodium phosphate (Soilax®, for example)
    c. 1 quart sodium hypochlorite 5% solution (Clorox®, for example)
    d. 3 quarts water

4. Caulking Compounds, Tar and Similar Substances — Use mineral spirits in reasonable amounts and apply directly to the foreign substance. Immediately after cleaning, rinse the area thoroughly with water.

CAUTION: Do not exceed the recommended concentrations of cleaners. To do so can cause damage to the Products' surface. Avoid skin and eye contact with the solution, and in all cases follow manufacturer's instructions for the use of cleaning compounds and solutions. Avoid use of abrasive-type cleaners and strong solvents. Test any cleaner on an inconspicuous area before applying to major areas. To minimize streaking, always clean from the bottom to the top and follow with a rinsing of clear water. Excessive scrubbing is unnecessary and can be harmful to the Products, and may cause undesirable glossy areas over the finish.

IMPORTANT: Fire Safety Information

Exterior vinyl building materials require little maintenance for many years. Nevertheless, common sense dictates that builders and suppliers of vinyl products store, handle and install vinyl materials in a manner that avoids damage to the product and/or structure. Owners and Installers should take a few simple steps to protect vinyl building materials from fire.

To The Home and Building Owner

Rigid vinyl siding is made from organic material and will melt or burn when exposed to a significant source of flame or heat. Building owners, occupants and outside maintenance personnel should always take normal precautions to keep sources of fire, such as barbecues, and combustible materials, such as dry leaves, mulch and trash away from vinyl siding.

To the Building Trades, Specifiers, Professional and Do-It-Yourself Installers

When rigid vinyl siding is exposed to significant heat or flame, the vinyl will soften, sag, melt or burn, and may thereby expose material underneath. Care must be exercised when selecting underlayment materials because many underlayment materials are made from organic materials that are combustible. You should ascertain the fire properties of underlayment materials prior to installation. All building materials should be installed in accordance with local, state and federal building code and fire regulations.

For more information about vinyl siding products, contact the Vinyl Siding Institute, 1275 K St. NW, Washington DC 20005-4006 and request brochures titled, "Fire Properties" or "What Homeowners Want to Know."
